Online Training

Course Description

The Aviat Certified Installer Certification covers the learning content and assessments focused on developing skills required for installing Aviat equipment. This certification is a specialized track targeted at installers working with Aviat products and builds on the foundational product knowledge provided by the prerequisite Aviat Networks Associate track.

The ACI track covers courses and additional KB articles relevant to installation of the latest Aviat products such as the CTR and Eclipse platforms. All exams are part of the completion criteria and are included as part of the learning course. On completion of all courses, student will be certified as Aviat Certified Installer (ACI).

Target Audience

This course is intended for individuals requiring knowledge of how to install the Aviat CTR and Eclipse platform and related radio equipment.

Prerequisites

- Aviat Network Associate (ANA) Certification.
- PC with Internet access, Internet browser software, access and subscription to AviatCare LMS.

Objectives

Upon successfully completing this course, participants will be able to:

- Demonstrate knowledge in the use of installation best practices when installing microwave equipment.
- Demonstrate specialized installation related skills and knowledge for Aviat products, namely the CTR and Eclipse platforms and the WTM series.

Course Outline

Course content subject to change. Revisions of Certification course content are based on introduction of new and enhanced products and technologies.

- Installation Best Practices
- Installing the Aviat CTR 8540
- Installing the Aviat CTR 8300
- Installing the Aviat Eclipse INU/INUe
- Installing the Aviat ODU600
- Installing the Aviat IRU600
- Assessments after each learning course

Installation Best Practices

The Installation Best practices course provides an introduction to fundamental topics for microwave installation. The topics include best practices around safety measures and planning steps for preventing hazards. Additionally best practices related for installing equipment to protect from lightning and harsh weather conditions are covered.

Installing the Aviat CTR8540

The CTR8540 Installation course provides students with an overview of the documentation required to install the CTR8540 product.

Installing the Aviat CTR 8300

The CTR 8300 Installation course provides students with an overview of the documentation required to install the CTR8300 product.

Installing the Aviat Eclipse INU/INUe

The Eclipse INU Installation course provides students with an overview of the documentation required to install the Eclipse INU product.

Installing the Aviat ODU600

The ODU 600 Installation course provides students with an overview of the documentation required to install the ODU600 outdoor radio product.

Installing the Aviat IRU600

The IRU600 Installation course provides students with an overview of the documentation required to install the IRU600 indoor radio product.

Assessments

Successfully completing a short assessment at the end of the course validates the students' knowledge of the information covered in the documentation and will provide students with credentials necessary towards the Aviat Certified Installer certification level.
