## Eclipse System Overview ELearning

TRN-WW-ECL-01-01E

---

### Course Specifics

Duration:	Self-paced e-learning (~1 hour)
Delivery Format	ELearning
Pricing:	US\$125.00
Materials provided:	Student Handbook (e-Book)

Online Training

### Course Description

The Eclipse System Overview course provides students with an overview of the basic features, equipment configuration and functionality for the Eclipse platform. Successfully completing a short assessment at the end of the course will provide students with credentials necessary towards the Aviat Network Associate certification level.

The Eclipse™ product family is a highly modular and scalable platform that delivers a unique combination of high capacity hybrid or all-packet transport, Carrier Ethernet/IP networking, and comprehensive mission critical microwave features, enabling operators to prepare for the all-IP future.

This course is also a pre-requisite for attending the Eclipse Installation, Operations and Maintenance (3-day) open-enrollment course.

### Target Audience

This course is intended for individuals requiring foundational knowledge of the Aviat Eclipse radio platform.

### Prerequisites

- No technical knowledge prerequisites are needed.
- PC with Internet access, Internet browser software, access and subscription to AviatCare LMS.

### Objectives

Upon successfully completing this course, participants will be able to:

- Understand the different network elements which are incorporated in Eclipse radio platform..
