Online Training

Course Description

The **WTM3300 System Overview** course provides students with an overview of the basic features, equipment configuration and functionality for the Aviat WTM 3300 all outdoor packet radio. Upon successfully completing the course and a short assessment students will receive the credentials necessary towards the Aviat Network Associate certification level.

The Aviat WTM 3300 features an advanced Carrier Ethernet switch and highly scalable microwave transport platform. Equipped with QPSK to 1024 QAM modulation in frequency bands from 6 to 42 GHz, the WTM 3300 supports throughput rates up to 1 Gbit/s.

Target Audience

This course is intended for individuals requiring knowledge of WTM3300 radio concepts.

Prerequisites

- No technical knowledge prerequisites are needed.
- PC with Internet access, Internet browser software, access and subscription to AviatCare LMS.

Objectives

Upon successfully completing this course, participants will be able to:

- Understand the different network elements which are incorporated in WTM3300 radio platform.
